## PROFILE

---

I am a Computer Science undergraduate who with a strong foundation in programming, algorithms, and software development. I have developed in a variety of languages and developed in the MVC framework using Object Oriented Programming. Seeking opportunities to further develop skills and contribute to projects.

## EXPERIENCE

---

### CS 366 / Languages and Tools

#### 2023

Created web pages using the MVC framework, HTML, CSS, C#, and JavaScript. Also performed unit testing, and developed using SOLID principles.

### CS 364 / Information Management

#### 2024

Learned how to write sophisticated queries and normalization of database tables. Developed E-R diagrams for relational databases. I also learned how to build, access, and maintain a database.
