EDUCATION

Western Oregon University

2021-2025

BS in Computer Science

PROFILE

I am a determined undergraduate in Computer Science actively seeking a career or internship. I have been described as a dependable, hardworking, team-player, with strong communication.

EXPERIENCE

Technical Project Assistant

2024- Present

Research developing and deploying a multitude of wide range software applications for the administrative office at willamette ENT, Documenting and modulating programs for long term use ensuring functionality and applicability beyond my expected internship employment. Assisting and applying my knowledge of IT solutions in solving ranging everyday tasks as well as developing, documenting, and educating the team on long term solutions to problems.

PROJECTS

Unity Game Development

2022 - Present

Small team doing Agile based Development focusing on clean modular code to ensure a quality product, it is a hobby project that we do in our spare time though we do make strides to make consistent minor progress to systems. I lead the development in seed based consistency, map generation, as well as game saving, core gameplay features, and multithreading and asynchronous running processes to ensure consistency and performance.
